

CAREER MAPPING IN HISTORIC PRESERVATION & TRADES

how to complete your career map:

1. find the bubbles describing jobs you have had in your career and fill them in. you may find it easiest to start with your current job and work backwards, or start with your first job/degree and work forwards. if you had more than one job/trade at the same time, try connecting them with a dotted line or circle. if you don't see the exact title for a job you have/had, pick the closest title, or draw a new bubble and write it in!
2. connect the filled in bubbles with a line or arrows showing the order in which you held each job.
3. fill out your information at the bottom of the page, take a picture (or save a screenshot) of your map, and email to info@historictrades.org!
